

# Sr. Software Engineer

---

San Francisco Bay Area

## About the position

Our client is looking for brilliant software engineers to join their team. You should have a passion for consumer products and want to help us achieve our goal of bringing the company to everyone. We push code daily, A/B test extensively, and have a primary role in experimenting with new ideas from inception to implementation. There's much to do, and you'll be responsible for making some really cool stuff happen.

Do you love iOS? From booking your next trip to picking up a car, our iOS app is integral to the experience. Be a member of a small team of talented engineers and play a major role in shaping an exciting app that's changing how people travel and think about car ownership.

---

# What you'll do

---

Use	Produce	Collaborate	Diagnose and resolve	Identify	Ensure	Work
Use the latest technologies to enable a first-class iOS experience.	Produce high-quality maintainable code, test it, collaboratively review it, and ship it.	Collaborate extensively with product managers, designers, and engineers to develop product features that drive our metrics.	Diagnose and resolve bugs.	Identify areas to improve and scale our architecture.	Ensure proper technical design and documentation.	Work efficiently in a constantly changing and growing environment where the process is fluid and creative solutions are desired.

# About you

- You love developing iOS apps and possess a real passion for the platform.
- You have 3+ years of professional experience shipping iOS apps available on the App Store.
- You are fluent in Objective-C and Swift and are well-versed in Auto Layout, Storyboard, and UIKit.
- You have an extensive understanding of the Cocoa framework.
- You are a strong communicator; explaining complex technical concepts and trade-offs to product managers, designers, and engineers is no problem for you.
- Your code review feedback is sought after and respected.
- You enjoy solving problems and helping others meet their goals.

## Bonus points if

- You have a track-record of shipping features that created an impact.
- You have an excellent understanding of networking, concurrency, and threading.
- You have experience writing applications for multi-platform projects that include watchOS or tvOS.

# Benefits

- Competitive salary and equity for all full-time employees
- Employer-paid medical, dental, and vision insurance and 401k match
- Flexible paid time off, 11 paid holidays, paid volunteer time off, and paid parental leave
- Monthly Fringe benefits stipend
- Monthly travel credit

# How to apply
