

Title: Master Data Analyst (Contract)

Location: San Francisco, CA

Compensation: Hourly

Client: Confidential

Company Overview:

Our Client is a fresh new start-up working to bring simplicity and delight to the world of nutritional supplements.

Job Description:

The Master Data Analyst role is responsible for the accuracy, integrity, and timeliness of master data in the ERP system Microsoft Navision. This includes assisting in the execution of information flow across multiple systems, as well as item setup and maintenance. This role is responsible for ensuring master data integrity in key systems and maintaining processes to support the quality of data and assisting in developing and maintaining requirements/specifications for the new or enhanced functionality of department operational reports.

Education and Experience Requirements:

- 2+ years of experience working in a supply chain environment, ideally within the CPG industry, with a top-tier ERP system (e.g., SAP, Oracle) or direct Microsoft Navision experience.
- Prior experience with supply chain master data, supply planning, or finance is strongly preferred
- Demonstrated knowledge of supply chain principles and best practices
- Ability to work independently and cooperatively.
